

Subject index

2198–T8

Correlation of microstructure and mechanical properties in friction stir welded 2198–T8 Al–Li Alloy, 489

22MnB5

Internal-friction analysis of dislocation–interstitial carbon interactions in press-hardened 22MnB5 steel, 439

304 SS

A hybrid refining mechanism of microstructure of 304 stainless steel subjected to ECAP at 500 °C, 615

3D printing

Exploring the mechanical strength of additively manufactured metal structures with embedded electrical materials, 474

6.5 wt% Si steel

Tensile properties of strip casting 6.5 wt.% Si steel at elevated temperatures, 412

700 °C A–USC

Microstructural stability and mechanical properties of a boron modified Ni–Fe based superalloy for steam boiler applications, 380

7075 aluminum alloy

Microstructure and mechanical properties of the semisolid slurries and rheoformed component of nano-sized SiC/7075 aluminum matrix composite prepared by ultrasonic-assisted semisolid stirring, 350

AA 7020–T6 alloy

In-situ investigation of the anisotropic mechanical behavior of rolled AA 7020–T6 alloy through lattice strain evolution during uniaxial tension, 519

AA1100 aluminum

Microstructural and mechanical properties of AA1100 aluminum processed by multi-axial incremental forging and shearing, 705

AA7050

On the effect of microstructure on the torsional response of AA7050T–7651 at elevated strain rates, 280

α -type Ti alloys

Influence of Zr content on β -phase stability in α -type Ti–Al alloys, 407

Accumulative roll bonding

Annealing texture of nanostructured steel-based composite, 604

Accumulative roll bonding

Investigation of nano-SiC_p effect on microstructure and mechanical properties of Al/TiH₂ foam precursor produced via ARB process, 80

Accumulative roll bonding

Microstructural evolution of nanostructured steel-based composite fabricated by accumulative roll bonding, 298

Accumulative roll bonding

Strengthening mechanisms in nanostructured interstitial free steel deformed to high strain, 656

Acoustic emission

The influence of grain size on acoustic emission characteristic in commercial-purity zirconium during tensile deformation, 89

Adiabatic plugging

Impact damage behaviors of Ti–6Al–4V alloy targets with different microstructures, 374

Adiabatic shear bands

Impact damage behaviors of Ti–6Al–4V alloy targets with different microstructures, 374

Aging precipitation

Dependence of tensile and compressive deformation behavior on aging precipitation in rolled ZK60 alloys, 724

AHSS steels

Role of the advanced microstructures characterization in modelling of mechanical properties of AHSS steels, 567

Al/TiH₂/nano-SiC hybrid composite

Investigation of nano-SiC_p effect on microstructure and mechanical properties of Al/TiH₂ foam precursor produced via ARB process, 80

Al₂O₃–ZrO₂

Three different alumina–zirconia composites: Sintering, microstructure and mechanical properties, 136

Al₃Ti

Fabrication of Ti–Al₃Ti core-shell structured particle reinforced Al based composite with promising mechanical properties, 269

Aluminium alloy

Effect of natural ageing and pre-straining on strength and anisotropy in aluminium alloy AA 6016, 65

Aluminium

Exploring the mechanical strength of additively manufactured metal structures with embedded electrical materials, 474

Aluminium–lithium alloy

Correlation of microstructure and mechanical properties in friction stir welded 2198–T8 Al–Li Alloy, 489

Aluminium alloy

A study of precipitation strengthening and recrystallization behavior in dilute Al–Er–Hf–Zr alloys, 307

Aluminum alloy

Influence of dendritic solute segregation on tensile properties of Al–4 mass% Cu alloy castings consisting of single columnar crystal, 540

Aluminum alloy

Quantitative study of nanoscale precipitates in Al–Zn–Mg–Cu alloys with different chemical compositions, 245

- Aluminum alloys
 - Effects of Sc and Zr on mechanical property and microstructure of tungsten inert gas and friction stir welded aerospace high strength Al–Zn–Mg alloys, 500
- Aluminum alloys
 - On the effect of microstructure on the torsional response of AA7050T–7651 at elevated strain rates, 280
- Aluminum alloys
 - Unusual behavior of the Portevin–Le Chatelier effect in an AlMg alloy containing precipitates, 37
- Aluminum matrix composite
 - Fabrication of Ti–Al₃Ti core–shell structured particle reinforced Al based composite with promising mechanical properties, 269
- Aluminum nitride
 - Mechanical and thermal properties of reduced graphene oxide reinforced aluminum nitride ceramic composites, 29
- Amorphous materials
 - The mechanism of power–law scaling behavior by controlling shear bands in bulk metallic glass, 663
- Anisotropy
 - Effect of natural ageing and pre–straining on strength and anisotropy in aluminium alloy AA 6016, 65
- Anisotropy
 - In–situ investigation of the anisotropic mechanical behavior of rolled AA 7020–T6 alloy through lattice strain evolution during uniaxial tension, 519
- Anisotropy
 - Mechanism of the anisotropy of yield ratio in TA5 titanium alloy plates, 314
- Annealing texture
 - Annealing texture of nanostructured steel–based composite, 604
- Annealing
 - A twin size effect on thermally activated twin boundary migration in a Mg–3Al–1Zn alloy, 534
- A–TIG welding
 - Studies on the weldability, microstructure and mechanical properties of activated flux TIG weldments of Inconel 718, 234
- Atom probe tomography
 - On the microstructure and strengthening mechanism in oxide dispersion–strengthened 316 steel: A coordinated electron microscopy, atom probe tomography and *In–situ* synchrotron tensile investigation, 585
- Austenite stability
 - Mechanical properties and austenite stability in hot–rolled 0.2C–1.6/3.2Al–6Mn–Fe TRIP steel, 559
- Austenitizing
 - Synergistic effect of austenitizing temperature and hot plastic deformation strain on the precipitation behavior in novel HSLA steel, 145
- Bake hardening
 - Internal–friction analysis of dislocation–interstitial carbon interactions in press–hardened 22MnB5 steel, 439
- Boron
 - Effect of boron addition on formation of a fine–grained microstructure in commercially pure titanium processed by hot compression, 691
- Boron
 - Microstructural stability and mechanical properties of a boron modified Ni–Fe based superalloy for steam boiler applications, 380
- Brazing
 - Microstructure evolution and mechanical properties of ZrO₂/TiAl joints vacuum brazed by Ag–Cu filler metal, 739
- Bulk amorphous alloys
 - Conjugated distribution of shear bands in a CuZr–based bulk metallic glass subjected to severe deformation, 389
- Bulk amorphous alloys
 - Stress corrosion cracking of a Zr–based bulk metallic glass, 681
- Bulk metallic glass (BMG)
 - Effect of W volume fraction on dynamic mechanical behaviors of W fiber/Zr–based bulk metallic glass composites, 417
- Bulk metallic glass
 - Effect of Ti addition on the glass forming ability, crystallization, and plasticity of (Zr_{64.13}Cu_{15.75}Ni_{10.12}Al₁₀)_{100–x}Ti_x bulk metallic glasses, 345
- Bulk metallic glass
 - Hierarchical amorphous structures in a Zr₅₀Cu₄₂Al₈ bulk metallic glass, 75
- Bulk metallic glasses
 - Different deformation behaviors of two *in–situ* Ti–based metallic glass matrix composites upon quasi–static and dynamic compressions, 717
- Calorimetry
 - Effect of dynamic recovery on structure formation in nickel upon high–pressure torsion and subsequent annealing, 155
- Carbides
 - Effect of carbon content on the microstructure and creep properties of a 3rd generation single crystal nickel–base superalloy, 732
- Casting
 - Conjugated distribution of shear bands in a CuZr–based bulk metallic glass subjected to severe deformation, 389
- Casting
 - Stress corrosion cracking of a Zr–based bulk metallic glass, 681
- Cellular materials
 - Drop weight impact behavior of functionally graded aluminum foam consisting of A1050 and A6061 aluminum alloys, 597
- Chemical composition
 - Quantitative study of nanoscale precipitates in Al–Zn–Mg–Cu alloys with different chemical compositions, 245
- Coarse grain heat affected zone
 - Effect of thermo–mechanical cycling on the microstructure and toughness in the weld CGHAZ of a novel high strength low carbon steel, 482
- Cohesive energy
 - Influence of Zr content on β –phase stability in α –type Ti–Al alloys, 407
- Cold drawing
 - Microstructure evolution and strengthening mechanisms of cold–drawn commercially pure aluminum wire, 103
- Columnar grain
 - Influence of dendritic solute segregation on tensile properties of Al–4 mass% Cu alloy castings consisting of single columnar crystal, 540
- Commercially pure aluminum wire
 - Microstructure evolution and strengthening mechanisms of cold–drawn commercially pure aluminum wire, 103
- Composite
 - Dual–reinforcement (TaC_{particle} + TaC_{dendrite})/FeGa magnetos–trictive composites, 370
- Composite
 - Effect of W volume fraction on dynamic mechanical behaviors of W fiber/Zr–based bulk metallic glass composites, 417
- Compressive strength
 - Corrosion behaviors, mechanical properties and microstructure of the steel matrix composites fabricated by HP–HT method, 671
