

Subject index

- 3D needle-punched composites
High temperature compression properties and failure mechanism of 3D needle-punched carbon/carbon composites, 105
- Acoustic emission
Deformation Mechanisms Underlying Tension-Compression Asymmetry in Magnesium Alloy ZK60 Revealed by Acoustic Emission Monitoring, 243
- Age hardening
Enhanced Mechanical Properties of an Al-Si-Cu-Mg Alloy at 300 °C: Effects of Mg and the Q-Precipitate Phase, 277
- Ageing treatment
Development of pseudoelasticity in Fe-10Ni-7Mn (wt %) high strength martensitic steel by intercritical heat treatment and subsequent ageing, 52
- Al-Mg-Si-Cu alloy
Effect of heating rate on mechanical property, microstructure and texture of Al-Mg-Si-Cu alloy during solution treatment, 8
- Al-Si
Enhanced Mechanical Properties of an Al-Si-Cu-Mg Alloy at 300 °C: Effects of Mg and the Q-Precipitate Phase, 277
- Aluminium alloy
Effect of Bismuth and Strontium Interaction on the Microstructure Development, Mechanical Properties and Fractography of a Secondary Al-Si-Cu-Fe-Zn Alloy, 28
- Aluminium alloys
New short T6 heat treatments for Aluminium Silicon alloys obtained by semisolid forming, 236
- Aluminum alloys
Deformation nanotwins in coarse-grained aluminum alloy at ambient temperature and low strain rate, 272
- Aluminum alloys
Spark Plasma Sintering of an Al-based powder blend, 18
- Aluminum alloys
The quantitative relationship between microstructure and mechanical property of a melt spun Al-Mg alloy, 212
- Aluminum
Influence of alloyed Sc and Zr, and heat treatment on microstructures and stress corrosion cracking of Al-Zn-Mg-Cu alloys, 173
- Anisotropy
Effect of heating rate on mechanical property, microstructure and texture of Al-Mg-Si-Cu alloy during solution treatment, 8
- Annealing
Nanoindentation creep behavior in a CoCrFeCuNi high-entropy alloy film with two different structure states, 111
- Bake-hardenable steel
Effect of microstructural features on the planar anisotropy of the R-value in Cu-added bake-hardenable steels, 82
- Bcc iron
Effect of Crystal Orientation on the Strengthening of Iron Micro Pillars, 133
- CALPHAD
Enhanced Mechanical Properties of an Al-Si-Cu-Mg Alloy at 300 °C: Effects of Mg and the Q-Precipitate Phase, 277
- Carbon/carbon
High temperature compression properties and failure mechanism of 3D needle-punched carbon/carbon composites, 105
- Colony size
The effects of colony microstructure on the fatigue crack growth behavior for Ti-6Al-2Zr-2Sn-3Mo-1Cr-2Nb titanium alloy, 252
- Composites
High temperature deformation behavior of Mg₆₇Zn₂₈Ca₅ metallic glass and its composites, 1
- Composites
Micromechanical and *in situ* Shear Testing of Al-SiC Nanolaminate Composites in a Transmission Electron Microscope (TEM), 229
- Compression properties
High temperature compression properties and failure mechanism of 3D needle-punched carbon/carbon composites, 105
- Compression
Fatigue behavior of Ti-6Al-4V foams processed by magnesium space holder technique, 157
- Creep
Enhanced Mechanical Properties of an Al-Si-Cu-Mg Alloy at 300 °C: Effects of Mg and the Q-Precipitate Phase, 277
- Deformation behavior
Investigation of the stress-induced martensitic transformation in pseudoelastic NiTi under uniaxial tension, compression and compression-shear, 76
- Deformation mechanisms
Deformation Mechanisms Underlying Tension-Compression Asymmetry in Magnesium Alloy ZK60 Revealed by Acoustic Emission Monitoring, 243
- Deformation mechanisms
Effect of Crystal Orientation on the Strengthening of Iron Micro Pillars, 133
- Deformation
Effect of carbon content on the mechanical properties and microstructural evolution of Fe-22Mn-C steels, 118

- Diffusionless austenite formation
 - Development of pseudoelasticity in Fe-10Ni-7Mn (wt %) high strength martensitic steel by intercritical heat treatment and subsequent ageing, 52
- Digital image correlation
 - Investigation of the stress-induced martensitic transformation in pseudoelastic NiTi under uniaxial tension, compression and compression-shear, 76
- Direct powder forging
 - A Study of Direct Forging Process for Powder Superalloys, 68
- Direction of approach of test temperature
 - Effect of direction of approach of test temperature on fracture toughness of Zr-2.5Nb pressure tube material, 190
- Dislocations
 - Deformation nanotwins in coarse-grained aluminum alloy at ambient temperature and low strain rate, 272
- Dislocations
 - Dynamic Strain Ageing, Deformation, and Fracture Behavior of Modified 9Cr-1Mo Steel, 39
- Dissimilar titanium alloys
 - Strain hardening behavior of linear friction welded joints between TC11 and TC17 dissimilar titanium alloys, 149
- Dynamic strain ageing
 - Dynamic Strain Ageing, Deformation, and Fracture Behavior of Modified 9Cr-1Mo Steel, 39
- EBS
 - Effect of Bismuth and Strontium Interaction on the Microstructure Development, Mechanical Properties and Fractography of a Secondary Al-Si-Cu-Fe-Zn Alloy, 28
- EBS
 - Effect of microstructural features on the planar anisotropy of the R-value in Cu-added bake-hardenable steels, 82
- Elastic modulus
 - Berkovich nanoindentation and deformation mechanisms in a hardmetal binder-like cobalt alloy, 128
- Electron Back-Scattered Diffraction (EBSD)
 - Effect of carbon content on the mechanical properties and microstructural evolution of Fe-22Mn-C steels, 118
- Electron microscopy
 - Deformation nanotwins in coarse-grained aluminum alloy at ambient temperature and low strain rate, 272
- Electron microscopy
 - Microstructural evolution of a delta containing nickel-base superalloy during heat treatment and isothermal forging, 265
- Extrusion
 - Microstructure and mechanical properties of as-cast and extruded Mg-8Li-3Al-2Zn-0.5Nd alloy, 198
- Failure mechanism
 - High temperature compression properties and failure mechanism of 3D needle-punched carbon/carbon composites, 105
- Fatigue crack growth rates
 - Study on the fatigue crack growth rates of Ti-5Al-5Mo-5V-1Cr-1Fe titanium alloy with basket-weave microstructure, 143
- Fatigue crack growth
 - The effects of colony microstructure on the fatigue crack growth behavior for Ti-6Al-2Zr-2Sn-3Mo-1Cr-2Nb titanium alloy, 252
- Fatigue
 - Fatigue behavior of Ti-6Al-4V foams processed by magnesium space holder technique, 157
- FEM of powder forging densification
 - A Study of Direct Forging Process for Powder Superalloys, 68
- Focused ion beam (FIB)
 - Micromechanical and *in situ* Shear Testing of Al-SiC Nanolaminate Composites in a Transmission Electron Microscope (TEM), 229
- Fracture behaviour
 - Effect of Bismuth and Strontium Interaction on the Microstructure Development, Mechanical Properties and Fractography of a Secondary Al-Si-Cu-Fe-Zn Alloy, 28
- Fracture toughness
 - Effect of direction of approach of test temperature on fracture toughness of Zr-2.5Nb pressure tube material, 190
- Fracture toughness
 - Fabrication of PSZ-Ti Composites by Spark Plasma Sintering and Their Mechanical Properties, 166
- Fracture toughness
 - Lamellar microstructure alignment and fracture toughness in Ti-47Al alloy by Electromagnetic Confinement and Directional Solidification, 94
- Glasses
 - High temperature deformation behavior of Mg₆₇Zn₂₈Ca₅ metallic glass and its composites, 1
- Grain boundary
 - Influence of alloyed Sc and Zr, and heat treatment on microstructures and stress corrosion cracking of Al-Zn-Mg-Cu alloys, 173
- Grain boundary
 - The Mechanical Behavior during Nanoindentation near the Grain Boundary in a Bicrystal FCC Metal, 218
- Grain refinement
 - Enhanced mechanical properties due to grain refinement and texture modification in an AZ61 Mg alloy processed by Small Strain Impact Forging, 204
- Hardmetal binder alloy
 - Berkovich nanoindentation and deformation mechanisms in a hardmetal binder-like cobalt alloy, 128
- Hardness
 - Berkovich nanoindentation and deformation mechanisms in a hardmetal binder-like cobalt alloy, 128
- Hardness
 - New short T6 heat treatments for Aluminium Silicon alloys obtained by semisolid forming, 236
- Heat treatment
 - High temperature deformation behavior of Mg₆₇Zn₂₈Ca₅ metallic glass and its composites, 1
- Heating rate
 - Effect of heating rate on mechanical property, microstructure and texture of Al-Mg-Si-Cu alloy during solution treatment, 8
- High manganese steel
 - Effect of carbon content on the mechanical properties and microstructural evolution of Fe-22Mn-C steels, 118
- High strength
 - Microstructure and mechanical properties of new high strength beta-titanium alloy Ti-1300, 182
- High temperature
 - High temperature compression properties and failure mechanism of 3D needle-punched carbon/carbon composites, 105
- High-entropy alloy
 - Nanoindentation creep behavior in a CoCrFeCuNi high-entropy alloy film with two different structure states, 111
- Hot-rolling process
 - Microstructure and tensile properties of hot-rolled Zr₅₀-Ti₅₀ binary alloy, 259
