Mapping of mechanical properties at microstructural length scale in WC-Co cemented carbides: Assessment of hardness and elastic modulus by means of high speed massive nanoindentation and statistical analysis

J.J. Roa, P. Sudharshan Phani, W.C. Oliver, L. Llanes

PII: S0263-4368(17)30899-5
DOI: doi:[10.1016/j.ijrmhm.2018.04.019](https://doi.org/10.1016/j.ijrmhm.2018.04.019)
Reference: RMHM 4720

To appear in: *International Journal of Refractory Metals and Hard Materials*

Received date: 5 December 2017
Revised date: 21 March 2018
Accepted date: 27 April 2018

Please cite this article as: J.J. Roa, P. Sudharshan Phani, W.C. Oliver, L. Llanes , Mapping of mechanical properties at microstructural length scale in WC-Co cemented carbides: Assessment of hardness and elastic modulus by means of high speed massive nanoindentation and statistical analysis. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Mapping of mechanical properties at microstructural length scale in WC-Co cemented carbides: Assessment of hardness and elastic modulus by means of high speed massive nanoindentation and statistical analysis
