Effect of specimen thickness on the creep deformation of a silica-based ceramic core material

Kaiwen Li, Weiguo Jiang, Shaogang Wang, Jiuhan Xiao, Langhong Lou

PII: S0925-8388(18)31972-8

DOI: [10.1016/j.jallcom.2018.05.253](https://doi.org/10.1016/j.jallcom.2018.05.253)

Reference: JALCOM 46229

To appear in: *Journal of Alloys and Compounds*

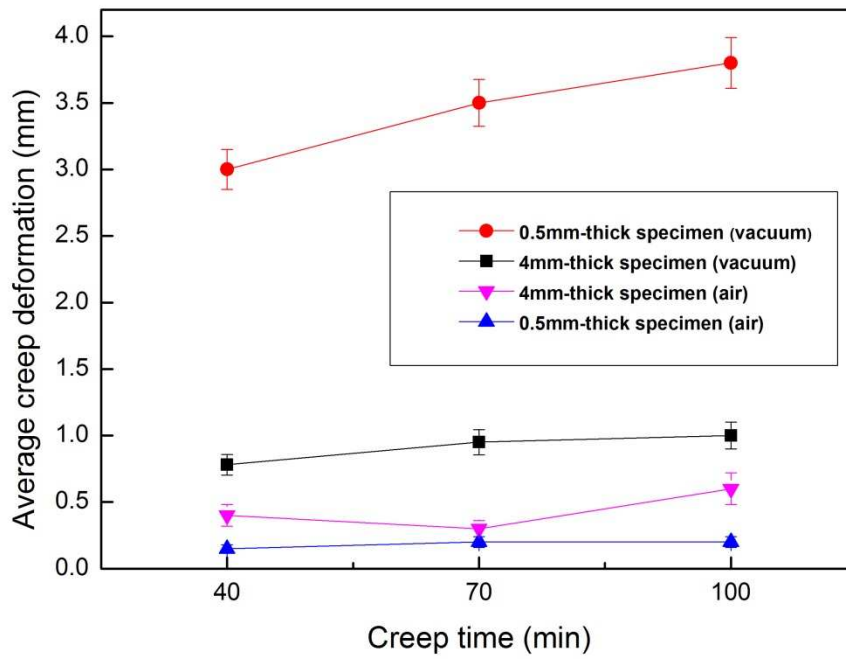

Received Date: 19 June 2017

Revised Date: 3 May 2018

Accepted Date: 21 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Creep deformation of specimens with different thicknesses under different atmospheres
