Nickel cobalt hydroxide/reduced graphene oxide/carbon nanotubes for high performance aqueous asymmetric supercapacitors

Zhi-Qiang Hou, Feng-Shou Tian, Yong-Ping Gao, Wen Wu, Li-Xia Yang, Xiao-Lu Jia, Ke-Jing Huang

PII: S0925-8388(18)31568-8

DOI: [10.1016/j.jallcom.2018.04.245](https://doi.org/10.1016/j.jallcom.2018.04.245)

Reference: JALCOM 45883

To appear in: *Journal of Alloys and Compounds*

Received Date: 21 February 2018

Revised Date: 9 April 2018

Accepted Date: 21 April 2018

Huang, Nickel cobalt hydroxide/reduced graphene oxide/carbon nanotubes for high performance aqueous asymmetric supercapacitors, *Journal of Alloys and Compounds* (2018), doi: 10.1016/j.jallcom.2018.04.245.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Nickel cobalt hydroxide/reduced graphene oxide/carbon nanotubes for high performance aqueous asymmetric supercapacitors
