Comparison between polyether titanate and commercial coupling agents on the properties of calcium sulfate whisker/poly(vinyl chloride) composites

Yunhua Lu, Xingwei Li, Chifei Wu, Shiai Xu

PII: S0925-8388(18)31178-2

DOI: [10.1016/j.jallcom.2018.03.301](https://doi.org/10.1016/j.jallcom.2018.03.301)

Reference: JALCOM 45531

To appear in: *Journal of Alloys and Compounds*

Received Date: 25 December 2017

Revised Date: 14 March 2018

Accepted Date: 24 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Comparison between polyether titanate and commercial
coupling agents on the properties of calcium sulfate
whisker/poly(vinyl chloride) composites**
