Efficient synthesis of perovskite-type oxide photocathode by nonhydrolytic sol-gel method with an enhanced photoelectrochemical activity

Taymaz Tabari, Mehdi Ebadi, Dheerendra Singh, Basar Caglar, M. Baris Yagci

PII: S0925-8388(18)31273-8

DOI: [10.1016/j.jallcom.2018.03.396](https://doi.org/10.1016/j.jallcom.2018.03.396)

Reference: JALCOM 45626

To appear in: *Journal of Alloys and Compounds*

Received Date: 29 October 2017

Revised Date: 29 March 2018

Accepted Date: 30 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Efficient Synthesis of Perovskite-type Oxide Photocathode by Nonhydrolytic Sol-Gel Method with an Enhanced Photoelectrochemical Activity
