Effect of amorphous phytic acid nanoparticles on the corrosion mitigation performance and stability of sol-gel coatings on cold-rolled steel substrates

Xiang Gao, Ru Yan, Lei Xu, Houyi Ma

PII: S0925-8388(18)30939-3

DOI: [10.1016/j.jallcom.2018.03.078](https://doi.org/10.1016/j.jallcom.2018.03.078)

Reference: JALCOM 45308

To appear in: *Journal of Alloys and Compounds*

Received Date: 26 October 2017

Accepted Date: 7 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effect of amorphous phytic acid nanoparticles on the corrosion mitigation performance and stability of sol-gel coatings on cold-rolled steel substrates

Xiang Gao¹, Ru Yan¹, Lei Xu¹, and Houyi Ma^{1*}
