Effect of physio-chemically functionalized graphene nanoplatelet reinforcement on tensile properties of aluminum nanocomposite synthesized via spark plasma sintering

Alok Bhadauria, Lavish K. Singh, Tapas Laha

PII: S0925-8388(18)31056-9

DOI: [10.1016/j.jallcom.2018.03.186](https://doi.org/10.1016/j.jallcom.2018.03.186)

Reference: JALCOM 45416

To appear in: *Journal of Alloys and Compounds*

Received Date: 14 December 2017

Revised Date: 20 February 2018

Accepted Date: 14 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
