Accepted Manuscript

The electrical and electrochemical properties of graphene nanoplatelets modified $75V_2O_5-25P_2O_5$ glass as a promising anode material for lithium ion battery

Mesfin A. Kebede, Nithyadharseni Palaniyandy, Rawya M. Ramadan, Eslam Sheha

PII: S0925-8388(17)33893-8

DOI: 10.1016/j.jallcom.2017.11.136

Reference: JALCOM 43829

To appear in: Journal of Alloys and Compounds

Received Date: 26 June 2017

Revised Date: 3 November 2017

Accepted Date: 10 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
