Development of graphite/silicone composites for use as flexible electrode materials

Ana Luísa Silva, Matheus Millen Corrêa, Grasielli Correa de Oliveira, Pedro Pablo Florez-Rodriguez, Carlos Alberto Rodrigues Costa, Felipe Silva Semaan, Eduardo Ariel Ponzio

PII: S0925-8388(16)32630-5

DOI: [10.1016/j.jallcom.2016.08.232](https://doi.org/10.1016/j.jallcom.2016.08.232)

Reference: JALCOM 38734

To appear in: *Journal of Alloys and Compounds*

Received Date: 6 April 2016

Revised Date: 10 August 2016

Accepted Date: 22 August 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Development of graphite/silicone composites for use as flexible electrode materials.
