

CONTENTS OF VOLUME 54

Number 1

- | | | |
|--|-----|---|
| Y.B. FU and D.W. BROOKES | 1 | Edge waves in asymmetrically laminated plates |
| A.L. RECHENMACHER | 22 | Grain-scale processes governing shear band initiation and evolution in sands |
| R.C. SMITH, S. SEELECKE,
M. DAPINO and Z. OUNAIES | 46 | A unified framework for modeling hysteresis in ferroic materials |
| H. KESSLER and H. BALKE | 86 | A continuum analysis of charge induced ferroelectric domain wall motions |
| H. KESSLER and H. BALKE | 113 | A continuum analysis of the driving force of ferroelectric/ferroelastic domain wall motions |
| L. BARDELLA | 128 | A deformation theory of strain gradient crystal plasticity that accounts for geometrically necessary dislocations |
| R.S. ELLIOTT,
N. TRIANTAFYLLIDIS and
J.A. SHAW | 161 | Stability of crystalline solids—I: Continuum and atomic lattice considerations |
| R.S. ELLIOTT, J.A. SHAW and
N. TRIANTAFYLLIDIS | 193 | Stability of crystalline solids—II: Application to temperature-induced martensitic phase transformations in a bi-atomic crystal |
| F.F. ABRAHAM | 233 | Addendum to “Unstable crack motion is predictable” [2005. JMPS 53, 1071] |

Number 2

- | | | |
|--------------------------------------|-----|---|
| J.L. DING | 237 | Thermal and mechanical analysis of material response to non-steady ramp and steady shock wave loading |
| J.P. PARMIGIANI and
M.D. THOULESS | 266 | The roles of toughness and cohesive strength on crack deflection at interfaces |

L.G. ZHAO, N.P. O'DOWD and E.P. BUSSO	288	A coupled kinetic-constitutive approach to the study of high temperature crack initiation in single crystal nickel-base superalloys
K. IKEDA, H. SASAKI and T. ICHIMURA	310	Diffuse mode bifurcation of soil causing convection-like shear investigated by group-theoretic image analysis
C.-H. GOH, D.L. MCDOWELL and R.W. NEU	340	Plasticity in polycrystalline fretting fatigue contacts
Q.-S. ZHENG, Z.-H. ZHAO and D.-X. DU	368	Irreducible structure, symmetry and average of Eshelby's tensor fields in isotropic elasticity
R. EDMUNDS, G.W. HUNT and M.A. WADEE	384	Parallel folding in multilayered structures
Q. YANG, L. STAINIER and M. ORTIZ	401	A variational formulation of the coupled thermo-mechanical boundary-value problem for general dissipative solids
A.G. LEACOCK	425	A mathematical description of orthotropy in sheet metals
P.J. TAN, S.R. REID, J.J. HARRIGAN, Z. ZOU and S. LI	445	Corrigendum to "Dynamic compressive strength properties of aluminium foams. Part II—'shock' theory and comparison with experimental data and numerical models" [<i>Journal of the Mechanics and Physics of Solids</i> 2005, 53, 2206–2230]

Number 3

H. CHAI	447	Crack propagation in glass coatings under expanding spherical contact
J.E. SHEPHERD, D.L. MCDOWELL and K.I. JACOB	467	Modeling morphology evolution and mechanical behavior during thermo-mechanical processing of semi-crystalline polymers
M. MARDER	491	Supersonic rupture of rubber
G. DEBOTTON, I. HARITON and E.A. SOCOLSKY	533	Neo-Hookean fiber-reinforced composites in finite elasticity
W. CAI, A. ARSENLIS, C.R. WEINBERGER and V.V. BULATOV	561	A non-singular continuum theory of dislocations
M. WENDLANDT, T.A. TERVOORT, J.D. VAN BEEK and U.W. SUTER	589	Segmental orientation in plastically deformed glassy PMMA
