Electrodeposition of amorphous Fe-Cr-Ni stainless steel alloy with high corrosion resistance, low cytotoxicity and soft magnetic properties

Enrico Bertero, Madoka Hasegawa, Samuel Staubli, Eva Pellicer, Inge K. Herrmann, Jordi Sort, Johann Michler, Laetitia Philippe

PII: S0257-8972(18)30578-4
DOI: doi:[10.1016/j.surfcoat.2018.06.003](https://doi.org/10.1016/j.surfcoat.2018.06.003)
Reference: SCT 23454

To appear in: *Surface & Coatings Technology*

Received date: 13 October 2017

Revised date: 21 May 2018

Accepted date: 4 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Electrodeposition of amorphous Fe-Cr-Ni stainless steel alloy with high corrosion resistance, low cytotoxicity and soft magnetic properties
