Large-scale hybrid silver nanowall-reduced graphene oxide biofilm: A novel morphology by facile electrochemical deposition

A.R. Rafieerad, A.R. Bushroa, Ahmad Amiri, V. Gopinath, M. Sookhakian, S. Baradaran, M. Rafieerad, S. Saber-Samandari, J. Vadivelu

PII: S0257-8972(18)30452-3
DOI: doi:[10.1016/j.surfcoat.2018.04.076](https://doi.org/10.1016/j.surfcoat.2018.04.076)
Reference: SCT 23360
To appear in: *Surface & Coatings Technology*
Received date: 4 December 2017
Revised date: 19 March 2018
Accepted date: 24 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Large-scale hybrid silver nanowall-reduced graphene oxide biofilm: A novel morphology by facile electrochemical deposition
