

## Accepted Manuscript

Synergetic effect of thicker nanocrystalline structure with high amount of strain induced martensite on surface characteristics of plasma nitrided austenitic stainless steel

P.G. Ranaware, M.J. Rathod

PII: S0257-8972(16)30478-9  
DOI: doi: [10.1016/j.surfcoat.2016.05.085](https://doi.org/10.1016/j.surfcoat.2016.05.085)  
Reference: SCT 21240

To appear in: *Surface & Coatings Technology*

Received date: 14 December 2015  
Revised date: 14 May 2016  
Accepted date: 31 May 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Manuscript Cover Page**

Respected Editors

**‘Synergetic effect of thicker nanocrystalline structure with high amount of strain induced martensite on surface characteristics of plasma nitrided austenitic stainless steel’** is our original work and hope it will meet standards of your journal.

Thanks

Dr. M.J. Rathod  
Mr. P.G. Ranaware
