Influence of coating morphology on adhesive bonding of titanium pre-treated by plasma electrolytic oxidation

S. Aliasghari, A. Němcová, P. Skeldon, G.E. Thompson

PII: S0257-8972(16)30042-1
DOI: doi: [10.1016/j.surfcoat.2016.01.042](https://doi.org/10.1016/j.surfcoat.2016.01.042)
Reference: SCT 20890

To appear in: *Surface & Coatings Technology*

Received date: 9 November 2015
Revised date: 21 January 2016
Accepted date: 22 January 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Influence of coating morphology on adhesive bonding of titanium pre-treated by plasma electrolytic oxidation

S. Aliasghari, A. Němcová*, P. Skeldon and G.E. Thompson

Corrosion and Protection Group, School of Materials, The University of Manchester, Oxford Rd., Manchester M13 9PL, England, U.K.
