Deposition time dependence of the morphology and properties of tin-catalyzed silicon oxide nanowires synthesized by the gas-jet electron beam plasma chemical vapor deposition method

A.O. Zamchiy, E.A. Baranov, S.Ya. Khmel, E.A. Maximovskiy, D.V. Gulyaev, K.S. Zhuravlev

PII: S0040-6090(18)30242-6
DOI: doi:[10.1016/j.tsf.2018.03.092](https://doi.org/10.1016/j.tsf.2018.03.092)
Reference: TSF 36596
To appear in: *Thin Solid Films*
Received date: 13 September 2017
Revised date: 27 March 2018
Accepted date: 31 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Deposition time dependence of the morphology and properties of tin-catalyzed silicon oxide nanowires synthesized by the gas-jet electron beam plasma chemical vapor deposition method
