

Accepted Manuscript

Optical semitransparent silver nanostructured layer electrode toward semitransparent lithium ion batteries

Elena Navarrete-Astorga, Jorge Rodríguez-Moreno, Francisco Martín, Luis Sánchez, Manuel Cruz-Yusta, Ricardo Schrebler, Enrique A. Dalchiele, José Ramón Ramos-Barrado

PII: S0040-6090(18)30136-6
DOI: doi:[10.1016/j.tsf.2018.02.041](https://doi.org/10.1016/j.tsf.2018.02.041)
Reference: TSF 36503

To appear in: *Thin Solid Films*

Received date: 29 September 2017

Revised date: 16 February 2018

Accepted date: 27 February 2018

Please cite this article as: Elena Navarrete-Astorga, Jorge Rodríguez-Moreno, Francisco Martín, Luis Sánchez, Manuel Cruz-Yusta, Ricardo Schrebler, Enrique A. Dalchiele, José Ramón Ramos-Barrado , Optical semitransparent silver nanostructured layer electrode toward semitransparent lithium ion batteries. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Optical semitransparent silver nanostructured layer electrode toward semitransparent lithium ion batteries
