Mechanical behavior of intragranular, nano-porous electrodeposited zinc oxide

Rejin Raghavan, Jamil Elias, Rolf Erni, Magdalena Parlinska, Laetitia Philippe, Johann Michler

PII: S0040-6090(15)00135-2
DOI: doi: [10.1016/j.tsf.2015.02.017](https://doi.org/10.1016/j.tsf.2015.02.017)
Reference: TSF 34097

To appear in: *Thin Solid Films*

Received date: 5 June 2014
Revised date: 20 January 2015
Accepted date: 2 February 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Mechanical behavior of intragranular, nano-porous electrodeposited zinc oxide

*Corresponding author: r.raghavan@mpie.de

Highlights

- Micromechanical behavior of intragranular, nanoporous electrodeposited ZnO thin films
- Densification by closure of porosity during indentation
- Resistance to fracture by crack deflection and blunting in porous films during microcompression
