

# Author's Accepted Manuscript

On detector linearity and precision of beam shift detection for quantitative differential phase contrast applications

Josef Zweck, Felix Schwarzhuber, Johannes Wild, Vincent Galioit

PII: S0304-3991(16)30069-9  
DOI: <http://dx.doi.org/10.1016/j.ultramic.2016.05.007>  
Reference: ULTRAM12147

To appear in: *Ultramicroscopy*

Received date: 22 January 2016  
Revised date: 6 May 2016  
Accepted date: 21 May 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

On detector linearity and precision of beam shift detection for  
quantitative differential phase contrast applications

Josef Zweck, Felix Schwarzhuber, Johannes Wild and Vincent Galioit
