

## Accepted Manuscript

A new model for the acoustic wake effect in aerosol acoustic agglomeration processes

Guangxue Zhang , Lili Zhang , Jinqing Wang , Zuohe Chi

PII: S0307-904X(18)30143-4  
DOI: [10.1016/j.apm.2018.03.027](https://doi.org/10.1016/j.apm.2018.03.027)  
Reference: APM 12218

To appear in: *Applied Mathematical Modelling*

Received date: 27 November 2017  
Revised date: 23 February 2018  
Accepted date: 19 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- New model of acoustic wake effect in aerosol acoustic agglomeration is established.
- New model has been verified to be much more accurate than the existing model.
- Particle agglomeration under the acoustic wake effect is calculated.
