Properties of Graph Distance Measures by Means of Discrete Inequalities

Matthias Dehmer, Zengqiang Chen, Frank Emmert-Streib, Yongtang Shi, Shailesh Tripathi, Aliyu Musa, Abbe Mowshowitz

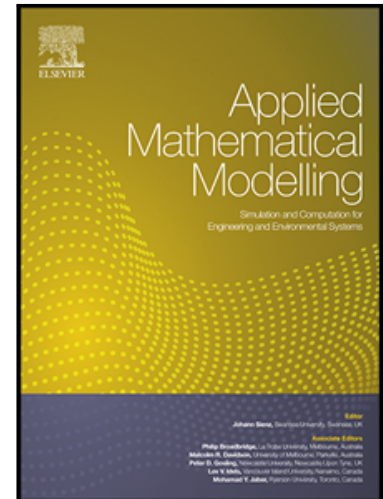

PII: S0307-904X(18)30039-8  
DOI: [10.1016/j.apm.2018.01.027](https://doi.org/10.1016/j.apm.2018.01.027)  
Reference: APM 12143

To appear in: *Applied Mathematical Modelling*

Received date: 31 July 2017  
Revised date: 28 October 2017  
Accepted date: 18 January 2018

Please cite this article as: Matthias Dehmer, Zengqiang Chen, Frank Emmert-Streib, Yongtang Shi, Shailesh Tripathi, Aliyu Musa, Abbe Mowshowitz, Properties of Graph Distance Measures by Means of Discrete Inequalities, *Applied Mathematical Modelling* (2018), doi: [10.1016/j.apm.2018.01.027](https://doi.org/10.1016/j.apm.2018.01.027)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- The approach is novel and application oriented
- It relates to compare networks in a new manner
- Could be applied to industrial applications (and many other areas)
- We analyzed mathematical properties
- The method is fast compared to classical approaches (e.g., graph isomorphism)
