This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- The indoor broadband sparse beamformer design is studied.
- The sparse design problem is formulated as L2-Lp optimization with  $p < 1$ .
- A smoothing BB-step gradient method is proposed for the problem.
- The proposed method achieves good indoor sparse beamformer designs.
