This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- How carbon cap regulation affects pricing of dual-channel supply chain is proposed.
- The coordination conditions of channel price discount contracts are investigated.
- Effects of two price discount contracts are compared by numerical example.
- Effects of carbon cap on selection of two price discount contracts are provided.
