

## Accepted Manuscript

Multi-period portfolio selection problem under uncertain environment  
with bankruptcy constraint

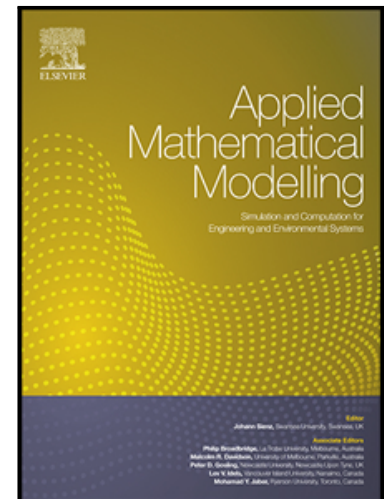

Bo Li, Yuanguo Zhu, Yufei Sun, Grace Aw, Kok Lay Teo

PII: S0307-904X(17)30747-3  
DOI: [10.1016/j.apm.2017.12.016](https://doi.org/10.1016/j.apm.2017.12.016)  
Reference: APM 12097

To appear in: *Applied Mathematical Modelling*

Received date: 19 June 2017  
Revised date: 1 November 2017  
Accepted date: 11 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- A multi-period uncertain portfolio selection problem is discussed.
- A new method is presented for modeling the multi-period uncertain portfolio selection problem.
- A deterministic transformation method is proposed for solving problem.
