A modified Physarum-inspired model for the user equilibrium traffic assignment problem

Shuai Xu, Wen Jiang, Xinyang Deng, Yehang Shou

PII: S0307-904X(17)30470-5
DOI: [10.1016/j.apm.2017.07.032](https://doi.org/10.1016/j.apm.2017.07.032)
Reference: APM 11882

To appear in: *Applied Mathematical Modelling*

Received date: 19 December 2016
Revised date: 3 July 2017
Accepted date: 18 July 2017

Please cite this article as: Shuai Xu, Wen Jiang, Xinyang Deng, Yehang Shou, A modified Physarum-inspired model for the user equilibrium traffic assignment problem, *Applied Mathematical Modelling* (2017), doi: [10.1016/j.apm.2017.07.032](https://doi.org/10.1016/j.apm.2017.07.032)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A modified *Physarum*-inspired model for the user equilibrium problem is proposed.
- Two-way traffic characteristics and multiple OD pairs are considered.
- The proposed *Physarum*-inspired model is very efficient in terms of both the accuracy and the execution time
