Magneto-electro interaction of two offset indenters in frictionless contact with magnetoelectroelastic materials

Yue-Ting Zhou , Sheng-Jie Pang , Yong Hoon Jang

PII: S0307-904X(17)30479-1
DOI: [10.1016/j.apm.2017.07.041](https://doi.org/10.1016/j.apm.2017.07.041)
Reference: APM 11891

To appear in: *Applied Mathematical Modelling*

Received date: 12 April 2017
Revised date: 1 July 2017
Accepted date: 20 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Interaction of two perfectly conducting indenters is examined.
- Various intensity factors are defined to measure singular behavior at the edges.
- Degradation from two perfectly conducting indenters to one indenter is done.
- Interaction between two semi-cylindrical indenters is revealed.
- Singularities at the edges can be suppressed because of multi-field coupling.
