A Binary Differential Search Algorithm for 0-1 Multidimensional Knapsack Problem

Jianjun Liu, Changzhi Wu, Jiang Cao, Xiangyu Wang, Kok Lay Teo

PII: S0307-904X(16)30313-4
DOI: [10.1016/j.apm.2016.06.002](https://doi.org/10.1016/j.apm.2016.06.002)
Reference: APM 11207

To appear in: *Applied Mathematical Modelling*

Received date: 4 September 2014
Revised date: 22 December 2015
Accepted date: 13 June 2016

Please cite this article as: Jianjun Liu, Changzhi Wu, Jiang Cao, Xiangyu Wang, Kok Lay Teo, A Binary Differential Search Algorithm for 0-1 Multidimensional Knapsack Problem, *Applied Mathematical Modelling* (2016), doi: [10.1016/j.apm.2016.06.002](https://doi.org/10.1016/j.apm.2016.06.002)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A differential search based optimization method is proposed to solve MKP;
- Various benchmarks are tested;
- Numerical comparisons show that our algorithm is effective.
