Minimal wave speed of a bacterial colony model

Tianran Zhang, Wendi Wang, Kaifa Wang

PII: S0307-904X(16)30409-7  
DOI: [10.1016/j.apm.2016.07.028](https://doi.org/10.1016/j.apm.2016.07.028)  
Reference: APM 11290

To appear in: *Applied Mathematical Modelling*

Received date: 24 December 2014  
Revised date: 20 January 2016  
Accepted date: 21 July 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Minimal wave speed of bacteria spread is obtained.
- Conditions for existence and non-existence of traveling wave solutions are obtained.
- An auxiliary system is introduced and the limit arguments are applied.
- Explicit upper bounds of colony waves are obtained.
