Dynamic analysis of lunar lander during soft landing using explicit finite element method

Guang Zheng, Hong Nie, Jinbao Chen, Chuanzhi Chen, Heow Pueh Lee

PII: S0094-5765(17)31115-3

DOI: [10.1016/j.actaastro.2018.04.014](https://doi.org/10.1016/j.actaastro.2018.04.014)

Reference: AA 6814

To appear in: *Acta Astronautica*

Received Date: 7 August 2017

Revised Date: 22 February 2018

Accepted Date: 10 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Dynamic Analysis of Lunar Lander during Soft Landing Using Explicit Finite Element Method
