

Accepted Manuscript

Resource portfolio design considerations for materially-efficient planning of 100% renewable electricity systems

Brian Tarroja, Brendan P. Shaffer, Scott Samuelson

PII: S0360-5442(18)31028-4

DOI: [10.1016/j.energy.2018.05.184](https://doi.org/10.1016/j.energy.2018.05.184)

Reference: EGY 13019

To appear in: *Energy*

Received Date: 10 January 2018

Revised Date: 7 April 2018

Accepted Date: 27 May 2018

Please cite this article as: Tarroja B, Shaffer BP, Samuelson S, Resource portfolio design considerations for materially-efficient planning of 100% renewable electricity systems, *Energy* (2018), doi: 10.1016/j.energy.2018.05.184.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Resource Portfolio Design Considerations for Materially-Efficient Planning of 100% Renewable Electricity Systems

Brian Tarroja^{1,2*}, Brendan P. Shaffer¹, and Scott Samuelson^{1,2,3}
