Experimental study of a novel hybrid solar-thermal/PV-Hydrogen system: towards 100% renewable heat and power supply to standalone applications

Jihane Assaf, Bahman Shabani

PII: S0360-5442(18)30959-9

DOI: 10.1016/j.energy.2018.05.125

Reference: EGY 12960

To appear in: *Energy*

Received Date: 29 November 2017

Accepted Date: 19 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Experimental study of a novel hybrid solar-thermal/PV-Hydrogen system: towards**
2 **100% renewable heat and power supply to standalone applications**
