Impact of a reduction in heating, cooling and electricity loads on the performance of a polygeneration district heating and cooling system based on waste gasification

Natalia Kabalina, Mário Costa, Weihong Yang, Andrew Martin

PII: S0360-5442(18)30487-0  
DOI: 10.1016/j.energy.2018.03.078  
Reference: EGY 12536  
To appear in: *Energy*  
Received Date: 07 October 2017  
Revised Date: 20 January 2018  
Accepted Date: 14 March 2018

Please cite this article as: Natalia Kabalina, Mário Costa, Weihong Yang, Andrew Martin, Impact of a reduction in heating, cooling and electricity loads on the performance of a polygeneration district heating and cooling system based on waste gasification, *Energy* (2018), doi: 10.1016/j.energy.2018.03.078

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# IMPACT OF A REDUCTION IN HEATING, COOLING AND ELECTRICITY LOADS ON THE PERFORMANCE OF A POLYGENERATION DISTRICT HEATING AND COOLING SYSTEM BASED ON WASTE GASIFICATION
