This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A hybrid system using direct contact membrane distillation for
water production to harvest waste heat from the proton
exchange membrane fuel cell

Xiaotian Lai, Rui Long*, Zhichun Liu, and Wei Liu*
