Toward to Efficient CO₂ Capture Solvent Design by Analyzing the Effect of Substituent Type Connected to *N*-atom

Rui Zhang, Qi Yang, Bing Yu, Hai Yu, Zhiwu Liang

PII: S0360-5442(17)32138-2
DOI: 10.1016/j.energy.2017.12.095
Reference: EGY 12044
To appear in: *Energy*
Received Date: 02 August 2017
Revised Date: 28 November 2017
Accepted Date: 19 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Toward to Efficient CO₂ Capture Solvent Design by Analyzing the Effect of Substituent Type Connected to N-atom
