This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- A novel adaptive estimation method of battery ECM parameters and SOC is presented.
- The battery parameters of the fast and slow dynamics are estimated separately.
- The proposed method does not require a full-order observer for SOC estimation.
- The battery modelling and SOC estimation accuracy is improved.
- The proposed algorithm is suitable for both offline and online implementation.
