

# Accepted Manuscript

A novel energy-saving pressure swing distillation process based on self-heat recuperation technology

Hui Xia, Qing Ye, Shenyao Feng, Rui Li, Xiaomeng Suo

PII: S0360-5442(17)31628-6

DOI: 10.1016/j.energy.2017.09.108

Reference: EGY 11602

To appear in: *Energy*

Received Date: 08 May 2017

Revised Date: 16 August 2017

Accepted Date: 24 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- Application of Self-heat recuperation (SHR) to PSD process was investigated.
- HEN was applied to design the heat integration of the novel SHR-PSD process.
- The novel SHR-PSD process could not only save energy but also reduce the TAC.
- The novel SHR-PSD process produced the lowest CO<sub>2</sub> emissions.
