This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- The study aims to find potential trade relations in international liquefied natural gas trade.
- A method combining link prediction and trade rules is proposed to find potential links.
- Countries with more trade partners are more likely to build new trade relations.
- Countries tend to trade liquefied natural gas with familiar trade partners.
- The trade role of a country effects the formation of new trade relations.
