High-throughput computational screening and design of nanoporous materials for methane storage and carbon dioxide capture

Minman Tong, Youshi Lan, Qingyuan Yang, Chongli Zhong

PII: S2468-0257(17)30109-7

DOI: [10.1016/j.gee.2017.09.004](https://doi.org/10.1016/j.gee.2017.09.004)

Reference: GEE 89

To appear in: *Green Energy and Environment*

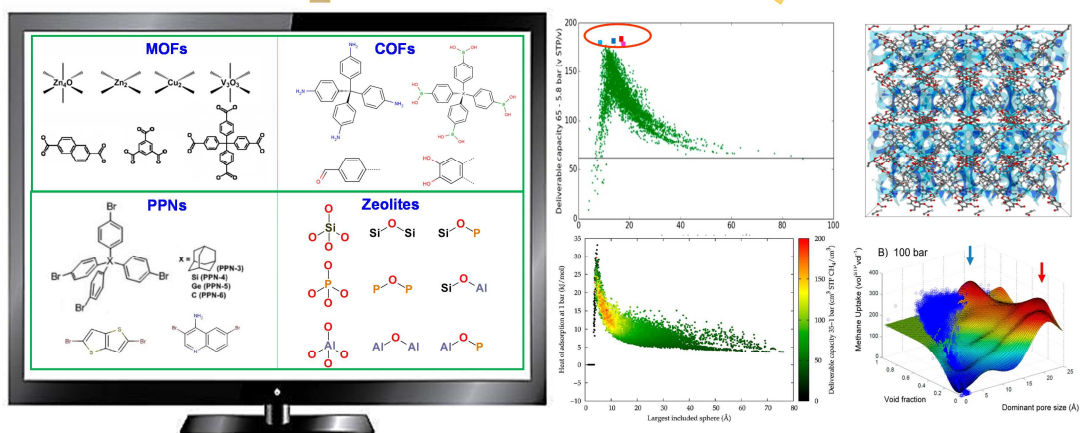

Received Date: 7 June 2017

Revised Date: 24 August 2017

Accepted Date: 30 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

High-throughput computational
screening and design
