Graphene Stirrer with Designed Movements: Targeting on Environmental Remediation and Supercapacitor Applications

Yang Huang, Wei Chen, Hongfei Li, Minshen Zhu, Fuwei Liu, Qi Xue, Zengxia Pei, Zifeng Wang, Lei Wang, Yan Huang, Chunyi Zhi

PII: S2468-0257(17)30118-8

DOI: [10.1016/j.gee.2017.10.004](https://doi.org/10.1016/j.gee.2017.10.004)

Reference: GEE 94

To appear in: *Green Energy and Environment*

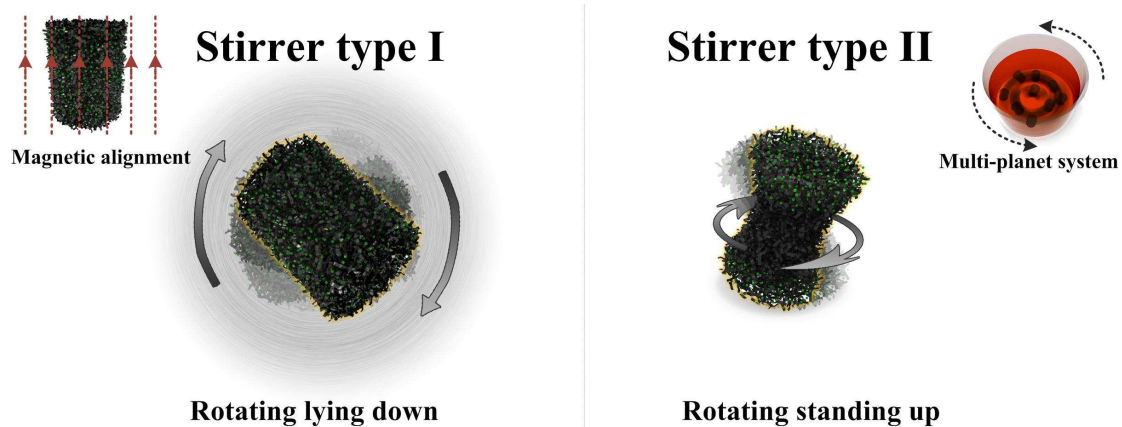

Received Date: 13 July 2017

Revised Date: 28 September 2017

Accepted Date: 31 October 2017

Zhi, Graphene Stirrer with Designed Movements: Targeting on Environmental Remediation and Supercapacitor Applications, *Green Energy & Environment* (2017), doi: 10.1016/j.gee.2017.10.004.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Two distinctive RGO-Fe₃O₄ stirrers were achieved that could dynamically respond to the rapidly changing magnetic field while executing designed movements precisely: rotating with lying down posture or standing straight posture, which demonstrates bright prospects in energy and environmental applications.
