Revised Date: 4 June 2018

Accepted Date: 15 June 2018

Please cite this article as: Zhang Y, Ma S, Yang H, Lv J, Liu Y, A big data driven analytical framework for energy-intensive manufacturing industries, *Journal of Cleaner Production* (2018), doi: 10.1016/j.jclepro.2018.06.170.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

### Highlights

A big data driven analytical framework for energy-intensive industries is proposed.

Useful information are mined by integrating big data and energy consumption analysis.

Energy-efficient decisions can be made based on the proposed framework.
