An integrated bioprocess for xylanase production from agriculture waste under open non-sterilized conditions: Biofabrication as fermentation tool

Altaf Ahmed Simair, Abdul Sattar Qureshi, Sippy Pirah Simair, Imrana Khushk, Sergey P. Klykov, Chaudhry Haider Ali, Changrui Lu

PII: S0959-6526(18)31347-7

DOI: [10.1016/j.jclepro.2018.05.020](https://doi.org/10.1016/j.jclepro.2018.05.020)

Reference: JCLP 12877

To appear in: *Journal of Cleaner Production*

Received Date: 12 February 2018

Revised Date: 28 April 2018

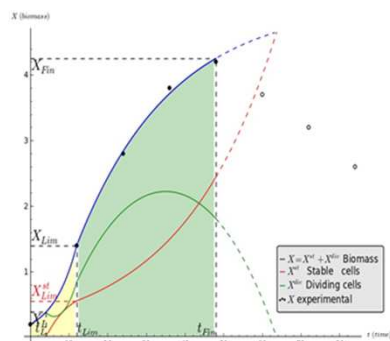

Accepted Date: 2 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

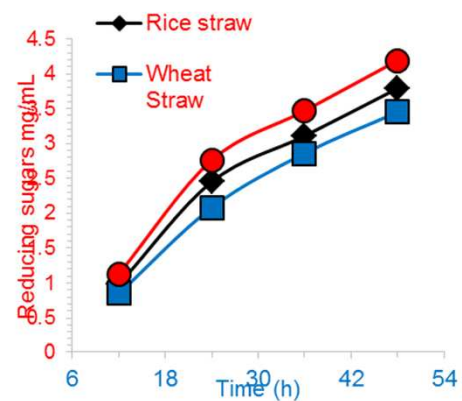

Microorganism

Optimization
(through Mathematical model)

Sterilization
(Open nonsterile fermentation for Xylanase production)

Saccharification of lignocellulosic biomass
