Performance enhancement of a combined cycle using heat exchanger bypass control: A thermodynamic investigation

M.N. Khan, I. Tlili

PII: S0959-6526(18)31320-9
DOI: 10.1016/j.jclepro.2018.04.272
Reference: JCLP 12853
To appear in: *Journal of Cleaner Production*
Received Date: 24 November 2017
Revised Date: 04 March 2018
Accepted Date: 30 April 2018

Please cite this article as: M.N. Khan, I. Tlili, Performance enhancement of a combined cycle using heat exchanger bypass control: A thermodynamic investigation, *Journal of Cleaner Production* (2018), doi: 10.1016/j.jclepro.2018.04.272

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
