This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Dear Editors,

We would like to submit the revised version of our paper JCLEPRO-D-17-08288R1 “A Framework for Selecting Lean Practices in Sustainable Product Development: the case study of a Brazilian Agroindustry” for publication in the Journal of Cleaner Production.

Our study proposes a framework with Lean tools and practices applied throughout the new product development and offers a customizable guide for the implementation of the Lean principles in the new product development. In addition, another important contribution of our paper resides in the empirical application of the framework to check for its robustness and real-world application.

Yours sincerely,

Fernando H. Lermen, Márcia E. Echeveste, Carla B. Peralta, Monique Sonogo, and Arthur Marcon
