Environmental assessment of olive pomace valorization through two different thermochemical processes for energy production

M.M. Parascanu, P. Sánchez, G. Soreanu, J.L. Valverde, L. Sanchez-Silva

PII: S0959-6526(18)30840-0

DOI: [10.1016/j.jclepro.2018.03.169](https://doi.org/10.1016/j.jclepro.2018.03.169)

Reference: JCLP 12427

To appear in: *Journal of Cleaner Production*

Received Date: 3 October 2017

Revised Date: 31 January 2018

Accepted Date: 17 March 2018

Please cite this article as: Parascanu MM, Sánchez P, Soreanu G, Valverde JL, Sanchez-Silva L, Environmental assessment of olive pomace valorization through two different thermochemical processes for energy production, *Journal of Cleaner Production* (2018), doi: 10.1016/j.jclepro.2018.03.169.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Environmental assessment of olive pomace valorization through**
2 **two different thermochemical processes for energy production**
