Optimisation and economic evaluation of the supercritical carbon dioxide extraction of waxes from waste date palm (*Phoenix dactylifera*) leaves

Karima Al Bulushi, Thomas M. Attard, Michael North, Andrew J. Hunt

PII: S0959-6526(18)30778-9

DOI: [10.1016/j.jclepro.2018.03.117](https://doi.org/10.1016/j.jclepro.2018.03.117)

Reference: JCLP 12375

To appear in: *Journal of Cleaner Production*

Received Date: 14 October 2017

Revised Date: 5 March 2018

Accepted Date: 11 March 2018

Please cite this article as: Al Bulushi K, Attard TM, North M, Hunt AJ, Optimisation and economic evaluation of the supercritical carbon dioxide extraction of waxes from waste date palm (*Phoenix dactylifera*) leaves, *Journal of Cleaner Production* (2018), doi: 10.1016/j.jclepro.2018.03.117.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Date palm leaves

Abundant low value
agricultural-waste

**ScCO₂
extraction**

- ✓ Green extraction technology
 - ✓ Efficient process
 - ✓ Selective fractionation
 - ✓ Low cost of manufacture

**Waxes**
