ABSTRACT

Biogas is one of the important renewable energy sources, which is expected to significantly

contribute not only for the successful achievement of a low carbon transition but also to achieve

global climate change policy targets. Private investment is identified as a critical factor for

biogas sector to fulfill its expected role. Hence, this paper emphasizes on identifying private

stakeholder's investment criteria in order to increase its active involvement for biogas in China.

This study focused on banks, insurance companies, pension funds, private equity funds and high

network individuals as the primary stakeholders. It applies an SWOT-AHP-TOWS analysis, in

which the Strengths, Weaknesses, Opportunities, and Threats (SWOT) of stakeholders are

identified and then prioritized by using the analytical hierarchy process (AHP). Finally, the

TOWS matrix supports the development of private investment strategies, which serve as a
