Facile acid treatment of multiwalled carbon nanotube-titania nanotube thin film nanocomposite membrane for reverse osmosis desalination

I. Wan Azelee, P.S. Goh, W.J. Lau, A.F. Ismail

PII: S0959-6526(18)30240-3
DOI: 10.1016/j.jclepro.2018.01.212
Reference: JCLP 11892
To appear in: *Journal of Cleaner Production*

Received Date: 14 September 2017
Revised Date: 21 January 2018
Accepted Date: 25 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Proposed elongation effect on the PS support surface, (a) during acid treatment, (b) during washing, and (c) after washing.
