This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlight

- Investigation on the relations between the UTII and air quality in 83 cities.
- Air pollution has significant time-lag effect.
- UTII has both positive and negative effects on air quality
- UTII can mitigate air pollution in the long run.
