Characterization and Properties of Natural Fiber Polymer Composites: A Comprehensive Review

M.R. Sanjay, P. Madhu, Mohammad Jawaid, P. Senthamaraiannan, S. Senthil, S. Pradeep

PII: S0959-6526(17)32394-6
DOI: 10.1016/j.jclepro.2017.10.101
Reference: JCLP 10893
To appear in: *Journal of Cleaner Production*
Received Date: 30 May 2017
Revised Date: 07 October 2017
Accepted Date: 09 October 2017

Please cite this article as: M.R. Sanjay, P. Madhu, Mohammad Jawaid, P. Senthamaraiannan, S. Senthil, S. Pradeep, Characterization and Properties of Natural Fiber Polymer Composites: A Comprehensive Review, *Journal of Cleaner Production* (2017), doi: 10.1016/j.jclepro.2017.10.101

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- Detailed review on various mechanical properties and characterization studies have been reviewed.
- New green materials resulted in the utilization of composites made from raw natural fibers and polymer matrices which are one of the most rapidly used research topics of recent times.
- Increased utilization of natural fiber as reinforcement for composite materials can diminish the use of synthetic fibers and reduce greenhouse gas emissions.
